To Whom It May Concern

Testimonial for Hormazd Paeterasp Vevaina

Dear Sir/Madam,

Hormazd Paeterasp Vevaina has been a student here at Nullspace Robotics since December 2024. Hormazd has shown competency in the respective robotics concepts taught at each level of our Robotics Certificate Programme and has met the course requirements through completion of the following courses:

- 1) Robotics Certificate Programme using **LEGO® SPIKE Prime™ – Beginner Level (Grade 1)**
- 2) Robotics Certificate Programme using **LEGO® SPIKE Prime™ – Intermediate Level (Grade 2)**
- 3) Robotics Certificate Programme using **LEGO® SPIKE Prime™ – Advanced Level (Grade 3)**

In addition, Hormazd has achieved the following results from his CSARC examinations:

- 1) CSARC Certificate in **LEGO® Robotics Grade 1 (Block-Based) – High Distinction**
- 2) CSARC Certificate in **LEGO® Robotics Grade 2 (Block-Based) – Merit**
- 3) CSARC Certificate in **LEGO® Robotics Grade 3 (Block-Based) – Merit**

Hormazd has also represented Nullspace in the following robotics competition:

- 1) **FIRST LEGO League Challenge 2025/2026 Season**

Throughout his time with us, Hormazd tackled various programming challenges in the curriculum well and demonstrates his good understanding in various programming and building concepts as shown in his CSARC certification results. Over time, Hormazd gained confidence in handling various programming tasks independently and strives to understand what was taught, always asking questions to clarify his doubts.

During the preparation phase for the FIRST LEGO League Challenge for the 2025/2026 Season, the team was introduced to a different block-based programming interface which had similarities to what they were previously familiar with. Hormazd quickly adapted to the new programming interface and took charge in programming and troubleshooting their team's robot program for the various programmed runs in the competition. Hormazd also works well with his teammates and with this strong teamwork, has demonstrated that together as a team, they were able to complete the designated robot runs within the given time limit.

The FIRST LEGO League Challenge has always been a demanding competition which requires students to not only complete a challenging mission across multiple robot runs but also work on a complex research problem faced by archaeologists and display the core values of FLL throughout the preparation and competition event days. Hormazd showed great leadership in FLL by steering his team in the right direction for both the robot mission strategy and the research objectives. Along the way, Hormazd continues to use his creativity and engineering skills to iterate on his robot attachment designs, striving to further improve and increase its reliability. Hormazd regularly takes the initiative to step up and contributes effectively to the team's troubleshooting of the robot, striving for the best robot's performance.

All in all, Hormazd has been an independent student who is able to adapt to various situations and strives to do his best in every aspect of competition preparation and worked hard together with his team to perform their best during the competition preliminaries. Throughout his robotics journey with us, Hormazd has demonstrated his good grasp of programming fundamentals and well versed in troubleshooting his programs by adapting well to varying program interface through having clear understanding on how to use them. I have the confidence that he has the potential to go far in the fields of STEM and Robotics.

For more details on Nullspace lesson curriculum, you may visit <https://sg.nullspace.co/centre-for-robotics-learning/lego-robotics-class/>. You may also visit <https://www.csarc.org/> to view the programming and robotics topics tested.
